

Environmental Management Principles

Policy No.: KDS-A-1600

Guided by the vision 'Optimize Living and Environment', KD Navien moves forward with the uncompromising conviction to make the world we live in healthier and more convenient —from the homes of its customers to the broader global environment inherited by future generations. Grounded on this unwavering commitment, KD Navien recognizes the environment as an essential component of its business operations and hereby establishes the Environmental Management Principles to be observed by all employees in conducting business in an environmentally responsible manner.

1. Environmental Management Leadership

KD Navien shall establish an environmental management system aligned with internationally recognized standards and continuously strive to conduct business in an environmentally responsible manner to safeguard the environment.

2. Climate Action

KD Navien shall set actionable goals for reducing greenhouse gas emissions, improving energy efficiency, and expanding the use of renewable energy in response to climate change, and ultimately achieve carbon neutrality.

3. Compliance with Laws and Agreements

KD Navien shall comply with all applicable environmental laws, regulations, and agreements and establish and uphold internal standards beyond legal requirements, thereby advancing its environmental management framework.

4. Product and Service Development

KD Navien shall take into account environmental impacts throughout the entire lifecycle in the development of products and services, thereby contributing to the efficient use of energy and the reduction of pollutant emissions.

5. Workplace Operation

KD Navien shall establish and implement systems for resource and water use, waste disposal, and pollutant control to operate its workplace in a manner that minimizes environmental impact and resource consumption.

6. Supply Chain Sustainability

KD Navien shall proactively support its suppliers in their environmental management efforts and establish and implement policies for sustainable supply chain management to minimize environmental impact across the entire value chain.

7. Biodiversity Conservation

KD Navien shall mitigate adverse impacts of its business operations and establish and implement policies aimed at conserving the natural environment to protect terrestrial and aquatic ecosystems.

8. Stakeholder Communication

KD Navien shall strive to ensure the reliability of environmental information and transparently disclose its environmental management performance to internal and external stakeholders.
